Mon - Fri 8:00am - 4:30pm

WELCOME...

...to Vermont, where the people are friendly, the moulding is beautiful and the weather is always better - unless it's not!

We have lots of new things for you this year!

TWO NEW PROFILES

Caps are our staple, and we have gone extreme at both ends of the scale.

Our tiny new #119 is only 3/8" wide! But don't be worried about joining it - the newly introduced Hoffmann W0 (see page 5 for more info) can handle it with ease.

You say you need a deeper moulding, and don't want to stack or pay for custom? Maybe the #194 can help - it's a full 4" tall! And again, Hoffmann to the rescue - as our newest machine can route to more than 3-1/2" high, so you will get a tight joint firmly supported all the way to the top with no nail holes necessary.

THREE NEW COLORS

Grey is in, and we have three of them - a light, medium and dark. Available on any Ash, Maple or Walnut moulding.

OTHER INTRODUCTIONS

We have added Satin Black to all our Ash profiles, added the availability of Ash in profile #184, and added both Ash and Cherry to the #158 profile.

DISCONTINUED

The Bird's Eye Maple profiles #413 and 415 are have been discontinued. Stock on hand is available until depleted.

Thanks for your support,

David and Rebecca Waldmann

FREIGHT

Shipping by UPS ground is pre-paid and added to your invoice. Larger orders or those containing lengths over 8' are shipped by truck. Shipping charges are actual freight cost plus an order processing charge of \$5 per order, plus pallets if required.

PAYMENT

We accept all major credit cards. We can ship your order UPS COD (additional charge applies). After your first order, ask us for a credit application if you would like to establish an account with terms of Net 30 Days. Returned checks will be subject to a \$35 charge. We reserve the right to request cash or equivalent for excessive NSF activity on your account.

RETURNS

Standard moulding that you have not cut, joined, or finished may be returned at your cost within 30 days for a credit on your account, minus the following restocking fees (no credit for wedges):

Raw Length 10%
Sanded or Finished Length 15%
Chops & Joined Frames 25%

Please note that any credit given will be for moulding returned in good, reusable condition - please package carefully! Finished Corner Frames, custom profiles, Yankee Heritage, predrilled or modified standard moulding, or items ordered with special finishing instructions may not be returned for credit.

ERRORS

We will gladly replace any item due to errors on our part, as long as you have neither cut, joined, finished or modified it in any way. If we ask for the item to be returned, you will be charged for the replacement if not returned within 30 days.

FACTS

Chops and frames are cut using the Fine Art Care and Treatment Standards (FACTS) terminology from the FRM-397 specifications. To calculate the footage you will be billed for a chop or frame, visit our website for an easy-to-use calculator.

CORNER SAMPLES

We have two types of corner samples, as well as chips:

MITERED CHOP - \$9.00 EACH, \$180 / SET OF 45

Our standard corner samples measure 6" and are chevron cut. The pieces are joined with Hoffmann dovetail wedges - the corner is representative of our Chop & Join option. A rebate will be applied to orders placed within the first year. Replacement and/or additional samples are available at no cost to customers purchasing \$1000 or more per year.

FINISHED CORNER - \$50 EACH, \$180 / SET OF 5

Finished Corner Frame samples measure 10½" long and the ends are blunt cut. The corner is representative of the join on a Finished Corner Frame.

CHIPS - FREE!

Chips are pieces of moulding that show finishes on woods. Chips are generally 4" - 6" long and have no particular cut. Chips can only be ordered in a wood and finish - specific profiles may not be requested.

ORDERING GUIDELINES

LENGTH

Length is 4'-8' sticks; however Walnut may be as short as 3 feet. There is a **minimum of 20' per item**. Orders of less than 20' will be billed at Straight Cut Chop prices. Requests for specified lengths will not be accepted.

We have the following quantity tolerances:

up to 75'	-1' to +4'
over 75'	+/- 5%

You should expect color variations throughout all length orders, so we recommend ordering 10-25% more than you need if purchasing to fill a specific order.

Length generally does not need to be cut for UPS, but requesting shorter lengths may save on shipping.

CHOPS

MITERED (DEFAULT) - Mitered to frame dimension with 1/8" allowance added (except 917-921 are Exact). Other specs available upon request.

DOVETAIL - Mitered chops routed for Hoffmann dovetail keys (provided). Your first dovetail is free.

STRAIGHT CUT - Matched straight cut pieces long enough for you to miter to standard frame dimension.

FRAMES

CHOP & JOIN - A pre-assembled frame ready to pop in your glass and mounting package. Assembled with Dovetail Wedges for a strong frame with no visible fasteners.

FINISHED CORNER - First assembled unfinished with the Hoffmann Dovetail Wedge system, then splines added to the corners and finished. A seamless look in solid colors, and a decorative, craftsman look in stained or natural finishes. Splines are of the same species as the frame unless otherwise requested. Minimum charge is for 5 lineal feet. Any frame with one leg more than 30" will have a 1/2 x 2 strainer added by default.

Smaller frames (up to about 18 x 30 Outside Dimension) can be shipped in a standard cardboard box at no additional charge. Larger sizes will need to have a custom made crate built at additional cost. Maximum frame size for UPS shipment is approximately 80 united inches on the Outside Dimension (e.g. 20 x 60, 30 x 50, 40 x 40). Larger frames will need to be shipped by truck.

SHIPPING SCHEDULE

We stock only unfinished moulding. All finished items take 1-2 additional days. Finished corner frames take 1-2 weeks. Any larger order may take additional time to process or for milling of stock.

All orders received by noon are put into process for that day (i.e. raw chops shipped same day).

OVERSIZE

There is an Oversize Charge for each chop or frame requiring a large amount of moulding.

over 12'	10%
over 16'	20%

COLOR MATCHING

Chops and frames are made with every effort to ensure that all four rails are of a similar color and grain. When possible, we cut each chop or frame from a single piece of moulding.

Multiple chops or frames are not selected to match one another unless specified, in which case there will be an extra charge.

2 frames	10%
3-4 frames	15%
5+ frames	25%

UPSIDE DOWN

If you're going to use a cap moulding upside down, such as for a Strip Frame, you must specify "to be used upside down" so the back of the moulding will be checked for blemishes and finished instead of the front. The following surcharges will apply:

Raw	 \$20 per chop or frame
Finished	 \$40 per chop or frame

ARTIST'S DISCOUNT

if you have a resale certificate and frame your work to sell, you may be eligible for our 25% Artists' Discount.

Please contact us for details.

ONLINE ORDERING

Set up an online account, have us link it to your customer code, and you can order any time of day or night. You'll also be able to review past orders and track your shipments too! **PLEASE NOTE: action is required on our end to complete the setup;** you must have this done by us in advance before you can take advantage of this system.

CHANGES/CORRECTIONS

Prices, terms, and conditions of sale are all subject to change without notice. Not responsible for typographical errors.

TERMINOLOGY

CUSTOM PROFILES

SUPERSIZE CAPS

Caps are the staple of many frame shops, and there is no end to the variations needed. While many companies offer "extenders", we can easily produce profiles up to 5-1/4" tall with a 1/4" or 5/16" rabbet with no lines or awkward joining, to the exact depth your project requires. Our equipment is also capable of making single-piece profiles up to 13" tall.

Here are a couple examples of the types of profiles that we run regularly for some of our customers. There is virtually no end to the variations of over-all size and rabbet configuration that we can produce to meet your requirements.

PROFILE MATCHING

Have a piece of existing moulding that you'd like more of? We can create a profile that will match what you have. Just send us a piece of the moulding and we'll do the rest!

TRULY CUSTOM DESIGNS

Want to create your own design? We offer complete profile design to your specification. Create a sketch or CAD drawing and send it in. The sky is the limit!

Custom profiles, including modified standard profiles, may not be returned for any reason except defects in material or workmanship.

QUANTITY TOLERANCES

20-99LF:	-10% to +35%
100-499LF:	-10% to +20%
500-1999LF:	-5% to +10%
2000+ LF:	-5% to +5%

See page 5 for some quick/easy modifications to our stock profiles

HOFFMANN DOVETAIL WEDGES

FRAMES

The Hoffmann Dovetail Joining System allows us to ship ready-to-assemble frames. We offer dovetail wedges on our mitered chops so you can easily assemble frames yourself instead of paying for a pre-assembled frame and the additional shipping charges usually associated with them.

We route triangular slots into the back of each mitered rail which form a butterfly shape (aka dovetail) when joined. We'll ship you a plastic piece (aka key) to fit in each slot. The wedging of the keys provides the correct clamping pressure for the glue, and the end result is a tight, perfectly aligned joint with no marks on the face or sides. For more information, visit vermonthardwoods.com/dovetail.

We use three sizes of keys - W0 for mouldings up to 5/8" face, W1 for all other mouldings, and W2 for strainer and stretcher. We can route more than 3 1/2" high, for proper fit on even the tallest profiles.

Apply glue to the rails

Lightly pound in the wedges

STRAINERS & STRETCHERS

The Hoffmann dovetail system is also available for your mitered stretchers. This can be especially helpful on supersize canvases that would be impractical to transport assembled, or for even medium sized ones that need to be shipped. Cross bars are butt joints, and will also be routed for dovetail wedges.

QUICK MODIFICATIONS, TYPICAL (OTHERS AVAILABLE)

Trim Cap Height

\$1.00 / LF
\$30.00 min.

Trim Floater Height

\$20.00 min.

SQUARE CAPS

DECORATIVE CAPS

FINISHED CORNER FRAMES

Handcrafted one at a time using splines of matching (or contrasting) wood, hand sanded, and finished with multiple coats of finish for the ultimate in appearance and durability.

FLATS

Lots of people love the look of the cut away side profile, but then immediately wonder "How am I going to join that?". We have three options to offer:

1. Order chops with the Hoffmann Dovetail! It's easy and almost foolproof. See Page 5 for more info.

2. We offer a reverse profile that can be used in your underpinner or vise, available at no charge with an order.

3. Some underpinner manufacturers offer a thin fence insert/extension that will work with this profile.

FLOATERS

Frame sizes are measured relative to the point indicated by the arrow in the drawing.

See page 11 for special finish options.

The shelf on the L-floaters is made of Basswood and will have the same type of finish as the moulding.

* Standard Allowance on the starred profiles is 0" (Exact).

ACCESSORIES

SPACER

Standard Allowance for all profiles on this page is Outside Dimension when ordered apart from a frame or chop.

Width: .180"

PREDRILLING

STRETCHER / STRAINER

Installing strainer can be a chore, but not when you specify our pre-drilling option! We use the Kreg® pocket hole system, and provide the proper screws; you will need a Square Drive screw driver for installation. Pre-drilling is available on any mitered or joined strainer.

We recommend 1 screw per 10" of rail with a minimum of 2 per side (21" x 37" would be 3 x 4).

Standard drilling is 3" from each end with any center holes distributed evenly (+/- 1"). Special drilling instructions per your request is also available at no additional charge.

There is a base charge of \$15.00 per strainer, plus \$1.00 per pair of holes:
 $3 \times 4 \text{ screws} = \$15.00 + \$1.00 * (3 + 4) = \22.00

STEP FLOATERS

Pre-drilling of step floaters is now available. We recommend 1 screw per every 10 inches or part thereof, i.e. 15 x 25 would be 2x3 screws. Pricing is a base charge of \$20 per frame plus \$1.50 per set of holes. For example, the previously mentioned frame would be $2 \times 3 \text{ screws} = \$20.00 + \$1.50 \times (2 + 3) = \27.50 . Screws are included.

Pre-drilled holes in step floater ~ Shown from below

SPECIAL FINISH OPTIONS ON FLOATERS

All of our floaters have the same finish applied to all outside surfaces by default. For added impact to your design, we can paint the bottom shelf and/or inside edge black.

GUARANTEE

We guarantee that you will be satisfied with the quality of both material and workmanship in all our products. If you are not, please notify us at once and we will take the necessary steps to correct the situation to your satisfaction. However, we do reserve the right to limit such action if you have cut, finished or joined the moulding in any way.

COLOR CHANGES

For some woods, such as Cherry and Mahogany, aging is the crowning touch. Ultraviolet light, oxidation, and handling all contribute to the patina of an old piece of wood, whatever specie it is. However, Cherry and Mahogany respond to these effects more quickly and dramatically than many others. The most obvious resulting color change is usually within the first few years, though minor changes will take place for many years.

GRAIN

The grain of wood looks different depending on whether you're looking at the face of the board or the edge of the board. The face of a moulding profile uses a specific side of the board depending on the profile dimensions, and is specified on each profile page.

For pictures of our face and edge finishes visit:

vermonthardwoods.com/finishes.asp.

YANKEE HERITAGE

LOOKING FOR A BUDGET LINE? LOOK NO FURTHER!

Many people love our natural solid hardwoods, but can't justify spending the money for the ultra-high yield stock that has become our standard. For those who don't demand long lengths that are straight and clear, we challenge you to find a better value than our Yankee Heritage lineup.

This product is perfect for those doing mostly smaller pieces (less than 20" x 24") or if you want more "character" (the trademark of solid wood) in your frames.

Note, however, that this is not just "the junk." We scrap material we don't think is useable. In fact many people tell us our Yankee Heritage is as good as or better than some companies' regular stock.

Here are some key points:

- All Yankee Heritage mouldings are machine sanded the same as our regular mouldings.
- Yankee Heritage is only available as Raw Length in the profiles listed.
- While we may have some in stock, often the stock will need to be run to order, which means that typical lead time will be one to two weeks.

MINIMUM ORDER

You must order at least 100' per item (e.g. 100' 120 Maple and 100' 132 Cherry, not 50' each of 120 Maple and 132 Cherry). However, if we have less than 100' in stock you may order just what's on hand.

VERMONT | hardwoods |

PINE

Country Eastern White Pine

Pine makes a unique and beautiful flooring or paneling. Each board is hand selected and milled with a square edge for traditional face nailing. Tongue and Groove is available upon request. Heart pine is also available.

HARDWOOD

Prime Bird's Eye & Walnut

Solid hardwood floors have long been the choice of discriminating homeowners. They've stood the test of time, and each of our grades (Country, Select, Prime) provide generations of service with hardly any maintenance.

ARCHITECTURAL

Cherry Stair Treads

We custom make stair treads, risers and all sorts of architectural trim such as baseboard, casing and crown moulding to match or contrast with your flooring material. See our web-site for more information.
