GREETING FRIENDS...

What a year, huh? We get a vaccine, and covid cases start dropping. Then the Delta variant comes in and things are about as bad as ever! And through it all, the consumer is consuming like there's no tomorrow!! Where will it end, and when? If my crystal ball was working, I'd be a rich man...

OK, on a more serious note, 2021, while generally way better for most people than 2020, has still been a bit of a roller coaster for most. Supply chains seem to have decided to take a chance on the game show "Weakest Link" and disappear without notice. We are thankful that, while we have had some tenuous moments, we have so far been able to keep our customers well drenched in glorious hardwood moulding.

As we're all aware, raw material costs have been skyrocketing, and we can no longer hold most of our prices. Our primary material, Hard Maple, was on contract for our years' supply, from November 2020 pricing, and our supplier honored it. Now, however, we are facing some items that are double or higher than what they were a year ago. Strangely enough, there are two species which are essentially unchanged (Basswood and Cherry) so we will be holding prices steady on those items.

The good news is that, since we are a manufacturer, material cost is only one component of our total cost. A material cost which doubles does not mean a price that's double. It's most noticeable in our Raw Length items, where some items have increased 15-25%, but the more labor that goes into an item, the less impact the raw material has on the total. For instance, a finished chop in those same items may have only gone up 10-15%.

Please make sure you update your POS system as soon as possible (updates have been sent to the software companies before this catalog was mailed).

Be well, be safe,

David and Rebecca Waldmann

Not So New...

WITH THE CANCELLATION OF WCAF 2021...

we didn't have a chance to present our new stuff in person this year, so we thought we'd remind you of some of the offerings we added over the past year, especially since WCAF 2022 has been either postponed to later in the year, or quite possible canceled until 2023.

THREE NEW PROFILES

As shown on page 3, we added two new caps and one new floater. It seems like no matter how many we have, you always want more options, and we are happy to oblige you!

Of course you always have the option of full custom sizes and/or designs.

FOUR NEW FINISHES

This past year we added a Greywash - like Whitewash, but with a grey tint (hey, we're masters at naming stuff, huh?). This is being offered on both Ash and Maple.

We have always tended to stick to the basics, but at the same time we've come to realize that we need to offer what people want! Most of our finishes have (other than the solid paints) been mostly enhancements to the original wood/color, like artificially making a wood look aged or antique. New complements to our line are Wheat on Maple and Golden Oak on Ash.

Don't forget - we can match just about any color. Best way? Give us a Benjamin Moore color. We've been doing a lot of those lately!

WHITE OAK

While we've been offering White Oak in its quartersawn form on our flat profiles for a few years now, with the increased attention White Oak has been gathering in the home decor space recently we decided it was time to offer it on all our square caps and L-Floaters. NOTE: because of how the moulding is produced from the board, it will tend to have a rift or quartersawn grain, but not consistently enough to call it one or the other.

GROOVY STEPS

A new Simple Modification is the addition of a Groove on the face of flat mouldings, or a Step on cap mouldings. See Page 7 for more info and pricing.

PHENOLIC BOARD

We have discovered that Phenolic Board makes a great surface to join with the Hoffmann Dovetail system. The smooth, hard surface ensures that the face of the joint is perfectly aligned, giving you an almost finished corner look when the miters are well cut.

We've been using it for decades in the shop to make jigs, templates, fixtures, etc since it's hard, stable and impervious to humidity changes, and yet can be cut with woodworking tools. We offer it in a 12" x 12" size in 1/2" thickness (just block up the other corners with the included 1/2" spacer on larger sized frames) or we can custom cut up to 24" x 48". See page 29 for more details and pricing.

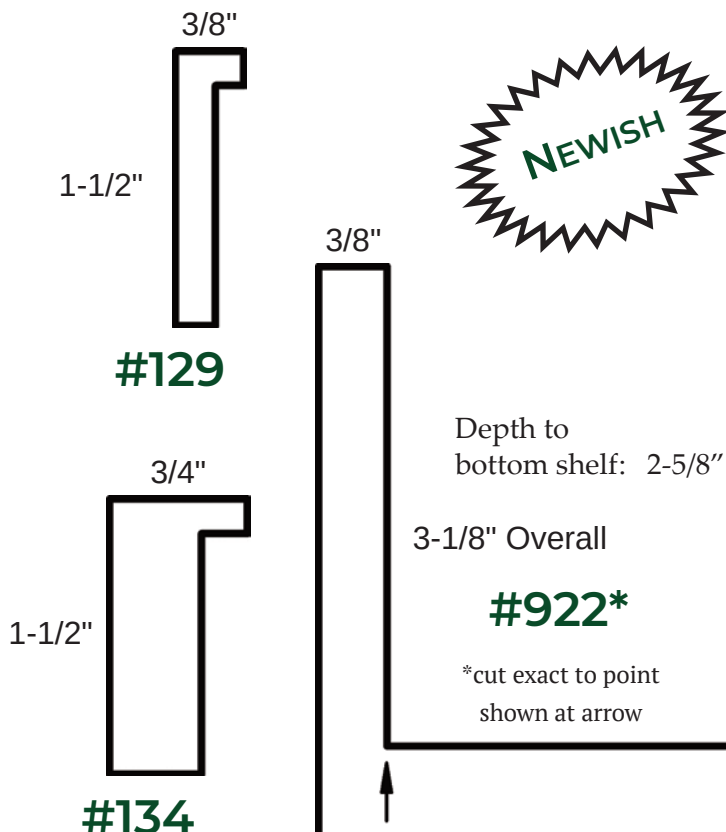

TERMS AND CONDITIONS

RETAIL PRICING - prices in this book are not suggested retail prices for wholesale accounts, they are the prices we charge customers who frame for themselves. If you are an artist or photographer who frames your own work for sale, and have a valid state business registration and resale tax account you may qualify for a discount off these prices.

FREIGHT - Shipping by UPS ground is pre-paid and added to your invoice. Larger orders or those containing lengths over 8' are shipped by truck. Shipping charges are actual freight cost plus an order processing charge of \$7.50 per order, plus a pallet charge if required. We are also happy to ship freight collect with the carrier of your choice.

PAYMENT

We accept all major credit cards. or we can ship your order UPS COD (additional charge applies). Established customers may ask us for a credit application if you would like to set up an account with terms of Net 30 Days. Returned checks will be subject to a \$35 charge. We reserve the right to request cash or equivalent for excessive Non Sufficient Funds activity on your account.

DOCUMENTATION

To reduce our costs, and therefore our prices, we use electronic communication whenever possible. While we welcome telephone calls, we do offer online ordering on our website for your convenience. All correspondence is via email with rare exception - this includes confirmation of electronic orders, quotes and invoices, as well as statements for those with open accounts.

Please ensure we are in your address book so our emails don't go in your junk/spam folders, and keep us informed of any changes to your email address.

Also, PLEASE remember to keep us updated if you've moved - UPS charges almost \$25 for address corrections...

FACTS

Chops and frames are cut using the Fine Art Care and Treatment Standards (FACTS) terminology from the FRM-397 specifications (copy available upon request). To find out the footage you will be billed for a chop or frame, visit our website for an easy-to-use calculator.

RETURNS

Standard moulding that you have not cut, joined, or finished may be returned at your expense **within 30 days** for a credit on your account, minus the following restocking fees (no credit for Hoffmann dovetails):

- Raw Length 10%
- Sanded or Finished Length 15%
- Chops & Joined Frames 25%

Please note that any credit given will be for moulding returned in good, reusable condition - please package carefully!

Finished Corner Frames, custom profiles, Yankee Heritage, predrilled or modified standard moulding, or items ordered with special finishing instructions may not be returned for credit.

ERRORS

It is the customers' responsibility to check orders for accuracy upon receipt and before assembly. We will gladly replace any item due to errors on our part, **within 30 days** of order receipt, as long as you have neither cut, joined, finished or modified it in any way. If we ask for the item to be returned, you will be charged for the replacement if not returned within 30 days.

ORDERING GUIDELINES

LENGTH

Length is typically 4'-8' sticks; however Walnut may be as short as 3 feet, and some larger profiles may be up to 10'. There is a minimum of 20' per item. Orders of less than 20' will be billed at Straight Cut Chop prices. Requests for specified lengths **will not be accepted**.

We have the following quantity tolerances:

up to 75'	-1' to +4'
over 75'	+/- 5%

You should expect color and grain variations throughout all length orders, so we recommend ordering 10-25% more than you need if purchasing to fill a specific order.

Length **generally** does not need to be cut for UPS, but requesting shorter lengths may save on shipping.

CHOPS

MITERED (DEFAULT) - Mitered to frame dimension with 1/8" allowance added (except 119 & 129 are +1/16 and 917-922 are Exact). Other specs available upon request.

DOVETAIL - Mitered chops will be routed for the Hoffmann dovetail, and keys are provided. Your first dovetail order is free.

STRAIGHT CUT - Matched straight cut pieces long enough for you to miter to standard frame dimension.

FRAMES

CHOP & JOIN - A pre-assembled frame ready to pop in your glass and mounting package. Assembled with Dovetail Wedges for a strong frame with no visible fasteners.

FINISHED CORNER - First assembled unfinished with the Hoffmann Dovetail Wedge system, then splines added to the corners and finished. A seamless look in solid colors, and a decorative, craftsman-like look in stained or natural finishes. Splines are of the same species as the frame unless otherwise requested. Minimum charge is for 5 lineal feet. Any frame with one leg more than 30" will have a 1/2 x 2 strainer added by default unless you request a different one.

All joined frames will have a crating charge added, the cost will depend on the size. Maximum frame size for UPS shipment is approximately 80 united inches on the Outside Dimension (e.g. 20 x 60, 30 x 50, 40 x 40). Larger frames will need to be shipped by truck.

SHIPPING SCHEDULE

We stock only unfinished moulding. All finished items take 1-2 additional days. Finished corner frames take 1-2 weeks. Any larger order may take additional time to process or for milling of stock.

All orders received by noon are put into process for that day (i.e. raw chops shipped same day).

OVERSIZE

There is an Oversize Charge for each chop or frame requiring a large amount of moulding.

over 12'	10% (5% for solid color paints)
over 16'	20% (10% for solid color paints)
over 10' rail	30% (25% for solid color paints)

COLOR MATCHING

Chops and frames are made with every effort to ensure that all four rails are of a similar color and grain. When possible, we cut each chop or frame from a single piece of moulding.

Multiple chops or frames are **not** selected to match one another unless specified, in which case there will be an extra charge.

2 frames	10%
3-4 frames	15%
5+ frames	25%

UPSIDE DOWN

If you're going to use a cap moulding upside down, such as for a Strip Frame, you must specify "to be used upside down" so the back of the moulding will be checked for blemishes and finished instead of the front. The following surcharges will apply:

Raw	\$20 per chop or frame
Finished	\$40 per chop or frame

ONLINE ORDERING

Set up an online account, have us link it to your customer code, and you can order any time of day or night. You'll also be able to review past orders. **PLEASE NOTE: action is required on our end to complete the setup and show customer specific prices**; otherwise, pricing shown will be Retail. Also, if you have requested non-priced options, such as special paint instructions or simple modifications, you will receive a separate email showing those additional selections.

CHANGES/CORRECTIONS

Prices, terms, and conditions of sale are all subject to change without notice. We are not responsible for typographical errors.

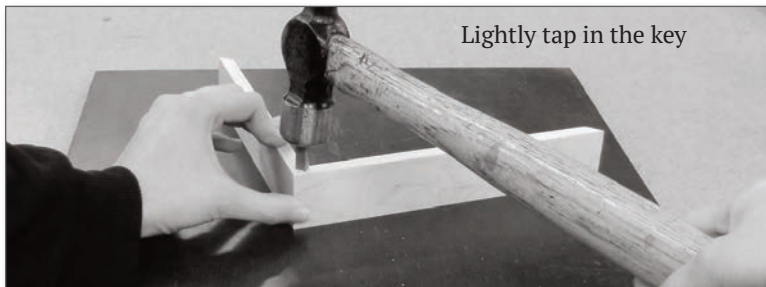

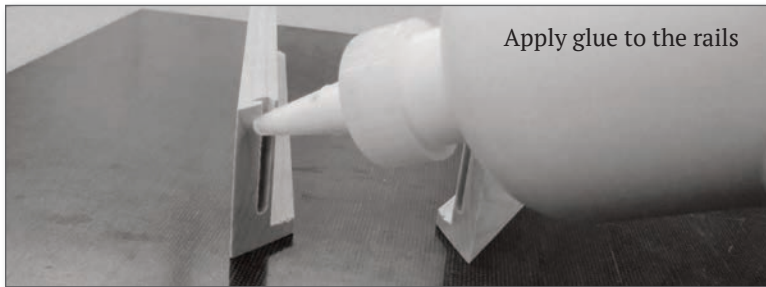

HOFFMANN DOVETAIL JOINING OPTION

FRAMES

This allows us to ship ready-to-assemble frames. We offer dovetail keys on our mitered chops so you can easily assemble frames yourself instead of paying for a pre-assembled frame and the additional shipping charges usually associated with them.

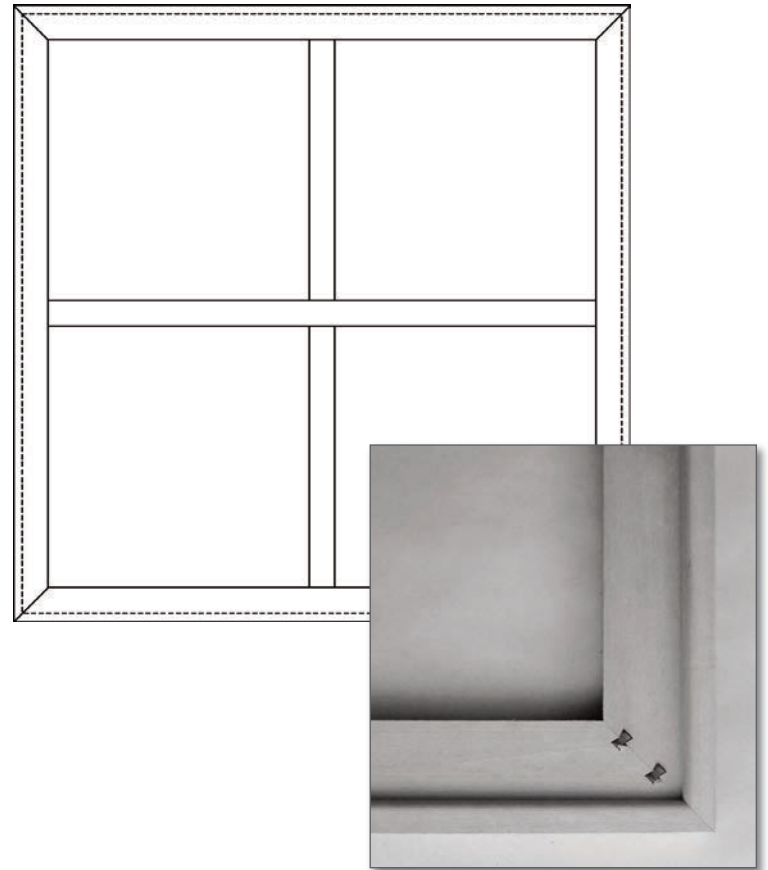

We route triangular slots into the back of each mitered rail which form a butterfly shape (aka dovetail) when joined. We'll ship you a plastic key which provides the correct clamping pressure for the glue, and the end result is a tight, perfectly aligned joint with no marks on the face or sides.

We use three sizes of keys - W0 for mouldings up to 5/8" face, W1 for all other mouldings, and W2 for strainer and stretcher. We can route more than 3½" high, for proper fit on even our tallest profiles.

STRAINERS & STRETCHERS

The Hoffmann dovetail system is also available for your mitered stretchers. This can be especially helpful on supersize canvases that would be impractical to transport assembled, or for even medium sized ones that need to be shipped.

CROSS BARS

Stretchers and strainers are often oversize, and cross bars can be used to strengthen the package. The Hoffmann Dovetail system is available to make the assembly painless.

In addition, the Hoffmann dovetail system can be used to add cross bars directly on any of our cap frames over 1-1/4" tall. This allows you to beef up a frame quickly, easily and less expensively than using a full strainer.

All cross bars routed for the Hoffmann system use 2" wide material and are available in thicknesses that match all standard strainer and stretcher material. See page 31 for pricing. Kreg pocket holes are another option for joining cross bars.

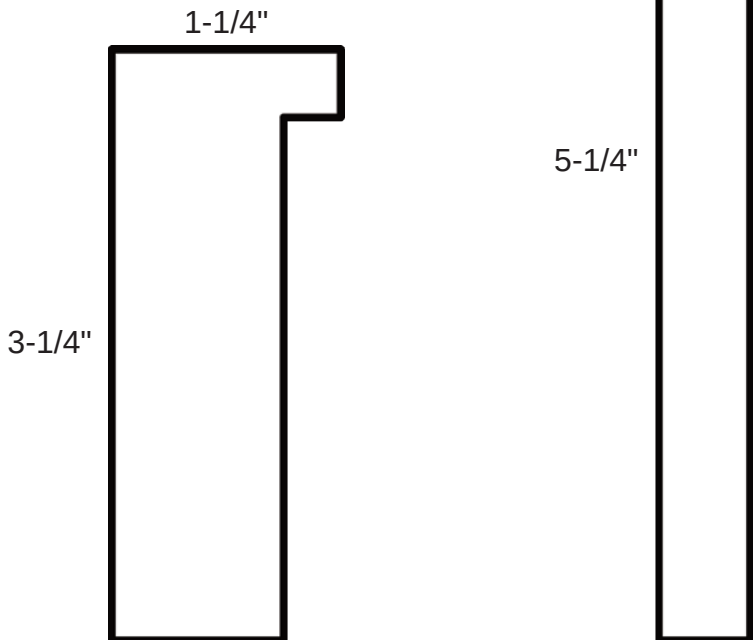

CUSTOM PROFILES

SUPERSIZE CAPS

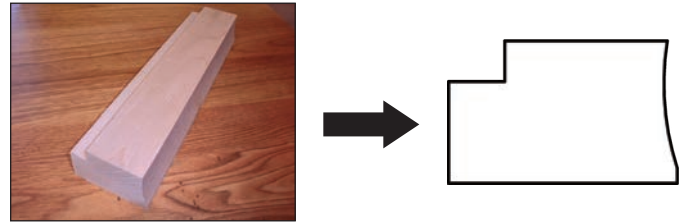

Caps are the staple of many frame shops, and there is no end to the variations needed. While many companies offer “extenders”, we can easily produce profiles up to 5-1/4" tall with a 1/4" or 5/16" rabbet with no lines or awkward joining, to the exact depth your project requires. Our equipment is also capable of making single-piece profiles up to 13" tall.

Here are a couple examples of the types of profiles that we run regularly for some of our customers. There is virtually no end to the variations of overall size and rabbet configuration that we can produce to meet your requirements.

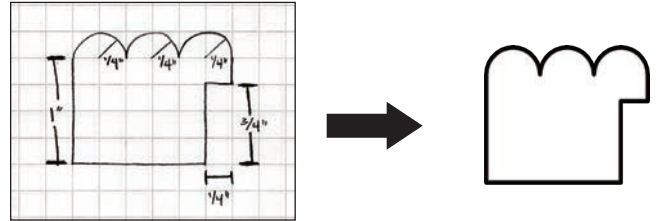

PROFILE MATCHING

Have a piece of existing moulding that you'd like more of? We can create a profile that will match what you have. Just send us a piece of the moulding and we'll do the rest!

TRULY CUSTOM DESIGNS

Want to create your own design? We offer complete profile design to your specification. Create a sketch or CAD drawing and send it in. The sky is the limit!

Custom profiles, including modified standard profiles, may not be returned for any reason except defects in material or workmanship.

QUANTITY TOLERANCES

Order Amount	Tolerance
20-99LF:	-10% to +35%
100-499LF:	-10% to +20%
500-1999LF:	-5% to +10%
2000+ LF:	-5% to +5%

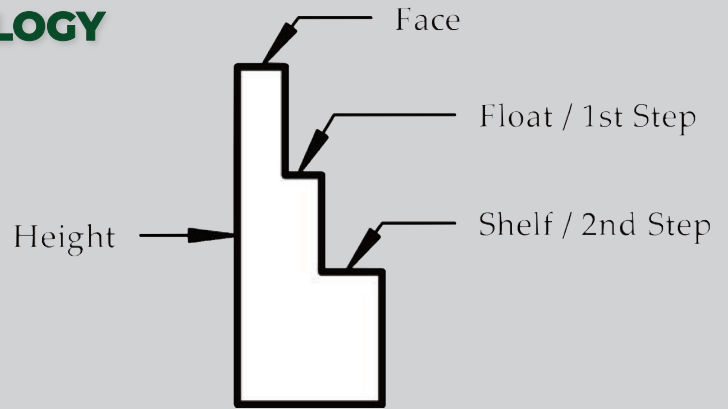

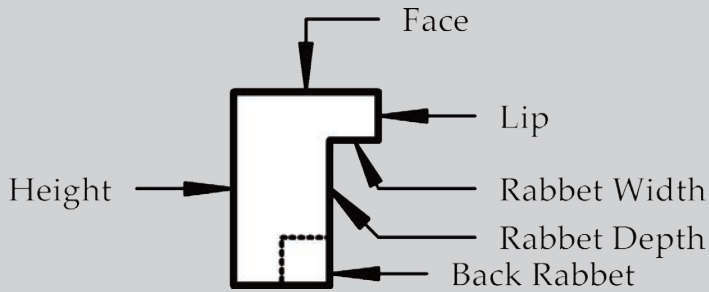

We work with framers, galleries and museums throughout the USA and Canada. Some of the more recognizable names would be the New York Museum of Modern Art, The Guggenheim, Bark Frameworks, Chelsea Frames, The Eric Carle Museum of Picture Book Art, the Beinicke Rare Book Library at Yale and the Arthur Sackler Gallery at Smithsonian, as well as numerous other less widely known but no less qualified clients.

To the right is a moulding made in two pieces of basswood, which was then embellished and gilded by the Sarasota Goldleaf Studio.

There is almost no job too small, too large, too simple or complex that our design and production team can't handle.

TERMINOLOGY

QUICK MODIFICATIONS

(OTHERS AVAILABLE)

Trim Cap Height

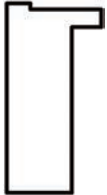

\$1.20 / LF
\$40.00 min.

Add Back Rabbet

\$1.20 / LF

Trim L Floater Width

\$2.00 / LF
\$70.00 min.

SAMPLES

We have two types of corner samples, as well as Swatches:

MITERED CHOP - \$12 EA, OR SET OF 47 FOR \$240

Our standard corner samples measure 6" and are chevron cut. The pieces are joined with Hoffmann dovetail wedges - the corner is representative of our Chop & Join option. A rebate will be applied to orders placed within the first year. Replacement and/or additional samples are available at no cost to customers purchasing \$1000 or more per year.

FINISHED CORNER - \$60 EA, SET OF 5 FOR \$240

Finished Corner Frame samples measure 10½" long and the ends are blunt cut. The corner is representative of the join on a Finished Corner Frame.

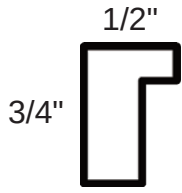

SWATCHES

Swatches are 2x2 chips that show our colors. If you just need one or two they are free. We also offer a complete set either in a counter-top box, or on a board for display on your wall. See page 31 for details.

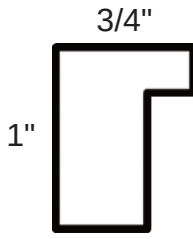

50% OFF FOR FRAMED SAMPLES!

That's right - make up a framed sample using one of our mouldings and receive a 50% credit on your account. All you have to do is send us a nice picture of the finished product, along with our "Request for Framed Sample Discount" form. Form available on our website.

PREDRILLING

STRETCHER / STRAINER

Installing strainer can be a chore, but not when you specify our pre-drilling option! We use the Kreg® pocket hole system, and provide the proper screws; you will need a Square Drive screw driver for installation. Pre-drilling is available on any mitered or joined strainer.

We recommend 1 screw per 10" of rail with a minimum of 2 per side (21" x 37" would be 3 x 4).

Standard drilling is 3" from each end with any center holes distributed evenly (+/- 1"). Let us know if you prefer a different layout.

There is a base charge of \$15.00 per strainer, plus \$1.00 per pair of holes:
 $3 \times 4 \text{ screws} = \$15.00 + \$1.00 \times (3 + 4) = \22.00 . Screws are included.

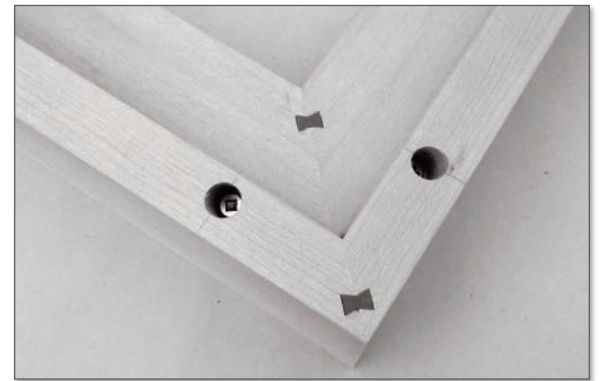

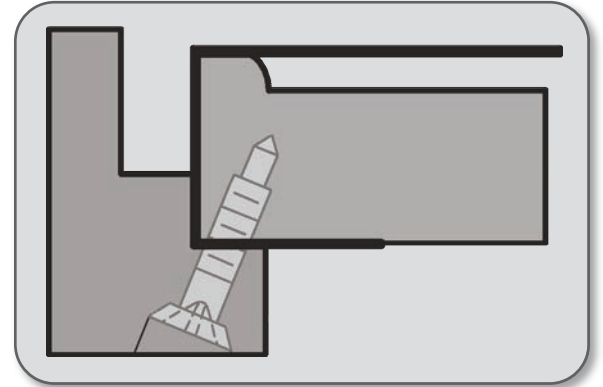

We can also drill for pocket holes on cross-bars. The charge is \$9.50 per bar.

Note: with multiple bars in opposite directions, they will be butted, not lapped, and the charge is per individual bar. For example if you specify "1 long and 1 short cross bar", the long will be split in two, and there will be 3 charges.

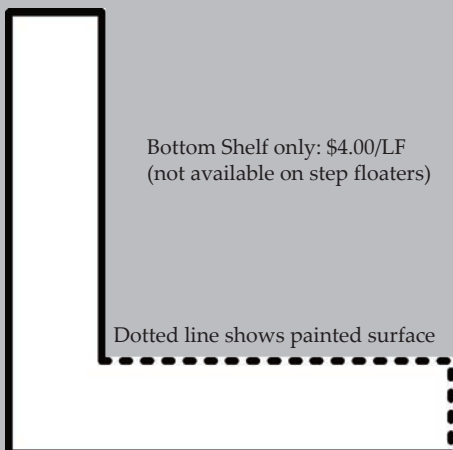

STEP FLOATERS

Pre-drilling of step floaters is now available. We recommend 1 screw per every 10 inches or part thereof, i.e. 15 x 25 would be 2x3 screws. Pricing is a base charge of \$20 per frame plus \$1.50 per set of holes. For example, the previously mentioned frame would be 2 x 3 screws = $\$20.00 + \$1.50 \times (2 + 3) = \$27.50$. Screws are included.

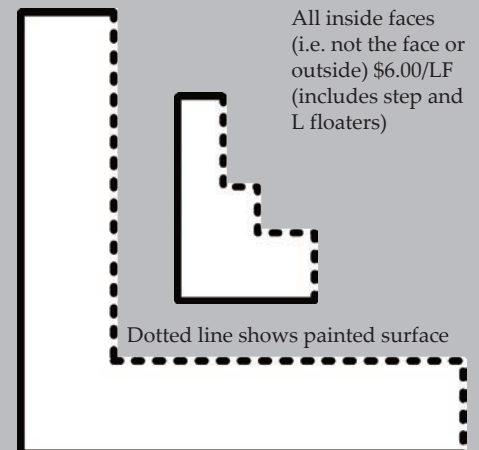

Pre-drilled holes in step floater ~ Shown from below

SPECIAL FINISH OPTIONS ON FLOATERS

All of our floaters have the same finish applied to all outside surfaces by default. For added impact to your design, we can paint the bottom shelf and/or inside edge black.

OAK, WHAT IS IT?

Red Oak is the indigenous species of our region, so for many years we just referred to it as “Oak”. However, because of the surge in interest of Red Oak’s more suave cousin White Oak, and our introduction of it into our line, we have slightly modified our description. Both “Oak, Red” and “Red Oak” refer to the product we’ve been offering for 40 years. The code remains the same - a simple “O” (not to be confused with a 0 - zero) so if you are ordering from a sample or an old order, if we confirm with “Red Oak”, don’t worry - that’s what you wanted, even if you didn’t know it!

GUARANTEE

We guarantee that you will be satisfied with the quality of both material and workmanship in all our products. If you are not, please notify us at once and we will take the necessary steps to correct the situation to your satisfaction. However, we do reserve the right to limit such action if you have cut, finished or joined the moulding in any way.

STRAIGHT CUT CHOPS

We get that most framers are budget conscious, and for good reason. Framing is a luxury item and many people find it out of their range. As a framer, it's your job to satisfy all the requirements to get the job, including budget.

Many of you have miter cutting equipment, but don't want to stock 50-100 feet of every item you offer, and hate to order chop for those occasional sales because you CAN do it yourself.

So, here's an option to help you, your customer and us. Get exactly what you need without paying chop prices! Give us your chop size (frame dimension/mat/glass size) and we will give you four matching pieces, blunt cut at least 1/2" longer than your finished outside dimension, at a significant savings.

NOTE: POS systems don't have a category for this, but you can see our pricing under the "Str. Cut" column in this catalog, or on our website.

#220

NEED SOME ADVICE?

No one here is an MCPF® or even a CPF®, and we can't make recommendations for specific technical aspects of a frame job (such as "is profile #143 strong enough for a 36 x 48 serigraph with museum glass or should I add a strainer, and if so, what size?").

However, we have been in the business for 40 years, and are happy to help where we can. A few places we've helped people in the past: Devising a cost effective way to cap a floater frame with glass. Providing a box to house multiple figurines so that they wouldn't have to be "mounted" to a backing.

Our extensive industry involvement and close ties to many leading shops and educators have enabled us to suggest sources for such things as oversized glazing and mount board. Even such things as non-wood framing suppliers, framing hardware, POS software, IT solutions, business training and more.

If you have a problem and just don't know where to turn, call Vermont Hardwoods and ask for David.

PHENOLIC BOARD

This synthetic material is used in a myriad of ways, but our number one recommendation is for assembling frames with the Hoffmann Dovetail system. See page 3 for the reason why.

12" x 12" and 1/2" thick - \$90.00. includes 3 pieces of 1/2 x 2 x 12 basswood to block up the other corners

Up to 24" x 48" - \$30.00 plus \$60.00/SF (12" increments)

Over 24 x 48 - priced per order. Max size 48 x 96, and will require truck shipment.

NOTE: all dimensions are nominal, and may be 1/16 to 1/4" less than stated dimensions, as it comes from a 48 x 96" sheet.

YANKEE HERITAGE

LOOKING FOR A BUDGET LINE? LOOK NO FURTHER!

Many people love our natural solid hardwoods, but can't justify spending the money for the ultra-high yield stock that has become our standard. For those who don't demand long lengths that are straight and clear, we challenge you to find a better value than our Yankee Heritage lineup.

This product is perfect for those doing mostly smaller pieces (less than 20" x 24") or if you want more character (the trademark of solid wood) in your frames.

Made from FAS stock in a mill run fashion (what comes out is what you get), many people tell us our Yankee Heritage is as good as or better than some companies' regular stock.

Here are some key points:

- All Yankee Heritage mouldings are machine sanded the same as our regular mouldings.
- Yankee Heritage is only available as Raw Length in the profiles listed.
- The stock will need to be run to order, which means that typical lead time will be one to two weeks.

MINIMUM ORDER

You must order at least 100' per item (e.g. 100' 120 Maple and 100' 120 Cherry, not 50' each of 120 Maple and 120 Cherry).

COLOR CHANGES

For some woods, such as Cherry and Walnut, aging is the crowning touch. Ultraviolet light, oxidation, and handling all contribute to the patina of an old piece of wood, whatever specie it is. Cherry responds quickly and more dramatically than many others, turning markedly darker and redder after even just a few days in direct sunlight. Walnut, on the other hand, lightens with age, turning a rich golden brown after a few months. These changes slow over time but will continue for many years.

GRAIN

The grain of wood looks different depending on whether you're looking at the face of the board or the edge of the board. The face of a moulding profile uses a specific side of the board depending on the profile dimensions, and is specified on each profile page.

For pictures of our face and edge grain with finishes visit our website. Select Wood Options and then Picture Frame Finishes.

CHOPPED SPACER

If you order spacer “to fit” a chopped frame, we miter cut it 0.015” (about 1/64”) less than the frame opening. If you’d like to trim to fit yourself ask for it “cut long” and we’ll add on for that.

PRE-DRILLING

	Base price	Per pair of holes
Strainer	15.00	1.00
Step floater	20.00	1.50

We recommend 1 screw per every 10 inches of rail and will place your order that way unless you instruct us otherwise.

SWATCH CHIPS

While corner samples are great, because we offer so many options it's sometimes difficult to visualize the array of colors available to you. To that end we have created our swatch chip.

These chips are the actual wood and finish used in our mouldings, made from spacer stock, with a size of 3/16" x 2" x 2".

The Board uses a magnetic system to hold the pieces in place while the Box is a simple open top container made from our #140 profile.

Swatch chips cost \$120 for the box or \$240 for the board and fall under the same guidelines as corner samples - a rebate for the cost will be applied to orders placed within the first year. Replacement and/or additional samples are available at no cost to customers purchasing \$1000 or more per year. Additionally, new customers/prospects can get up to four swatch chips mailed at no charge.

Size: 2-3/4 W x 2-1/2 H x 9-1/2 L

Size: 8-1/2 W x 30 H

Address Service Requested

Vermont Hardwoods Flooring

Pine

Country Eastern White Pine

Pine makes a unique and beautiful flooring or paneling. Each board is hand selected and milled with a square edge for traditional face nailing. Tongue and Groove is available upon request. Heart pine is also available.

Hardwood

Prime Bird's Eye & Walnut

Solid hardwood floors have long been the choice of discriminating homeowners. They've stood the test of time, and each of our grades (Country, Select, Prime) provide generations of service with hardly any maintenance.

Architectural

Cherry Stair Treads

We custom make stair treads, risers and all sorts of architectural trim such as baseboard, casing and crown moulding to match or contrast with your flooring material. See our website for more information.
